

Two-Way Radio Dealers Answering Service and Call Center Services

You're Business Assistant!

*Live Operator Answering Service
Designed Specifically for the Two-Way Radio Industry*

Voicemail is Killing Your Business: ▶ Many two-way radio dealers in the industry still use voicemail, answering machines, and automation to manage their call when they are unavailable. Every day your business could be losing calls (and profits) because the phone wasn't answered by you or a live operator when an important customer called.

Customers don't always abide by your schedule. And when they call, sometimes they need immediate assistance. Forcing them to wait for a response until you are available may be unacceptable and could result in losing customers or prospects. That's where our answering service and call center can help.

- ▶ Our operators understand the need for lead capture (getting the callers name and telephone number).
- ▶ We provide live operators 24/7/365 so your customers will never reach a recorded message.
- ▶ For just a fraction of the cost of hiring additional employees, our operators will act as your personal secretaries, projecting a professional image to your clientele and prospects. **We can even quote pricing!**
- ▶ For larger two-way radio dealers, we are able to manage calls for multiple locations and multiple service centers.

Premium Services Available ▶ We are able to be your total call center receptionist solution. We can schedule your appointments, give callers extended information on your products, give pricing information and tailor our services to meet your individual needs.
