KENWOOD

You're never alone with FreeTalk™

Exploring the great outdoors is something everyone can appreciate — especially if there's spectacular scenery. And it's even more enjoyable if you have company. So to keep in touch while you roam, be sure to pack a FreeTalk™ radio. No license required. Use it straight out of the box. FreeTalk™ — for all-season, all-terrain communications.

Talk Easy with **FreeTalk™**
FM Transceiver for FRS
UBZ-LH14

Available in Platinum, Yellow or Black

Any time. Anywhere. FreeTalk™ offers the ultimate in convenience, thanks to advanced technology and rugged reliability.

Small enough to fit comfortably in your hand, FreeTalk™ is packed with handy features. Several innovative functions offer unrivalled ease of use, while legendary Kenwood reliability provides peace of mind. FreeTalk™ is everything you want in point to point communications.

CORDS* (Communication Range Detection System)

This automatically checks to see if the person you want to talk to is within range by displaying an antenna mark on both radios if communications are possible. And, if your companion's radio moves out of range, you'll be notified with an alarm beep.

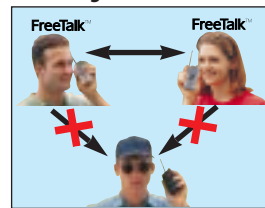

PrivacyTalk* plus Group Mode

Switch on the PrivacyTalk function and your conversations will be electronically scrambled so they can't be overheard on other FRS radios tuned to the same frequency. Also, the group mode allows you to chat with family and friends without hearing other FRS radio traffic.

* Requires group mode to be active.

PrivacyTalk

Others cannot listen in.

Group Mode

Others cannot be heard.

Auto Channel Select*

FreeTalk™ radios set to the same group mode can automatically search out and lock on to a vacant channel, allowing you to enjoy conversations free from interference.

* Requires group mode to be active.

180° Swivel antenna

The FreeTalk™ collapsible swivel antenna folds flush with the back panel for easy storage and allows for sideways or upright antenna orientation for comfort.

40 hours operation, 120 hours (max.***) on standby

Power-saving features give FreeTalk™ real staying power.

*** When Auto Power Off is disabled.

Based on a 1:1:8 (transmit: receive: standby) ratio.

Large display with icons

In addition to the channel and group mode displays, the helpful icons let you check on operational and battery status at a glance.

Also, the backlight feature is available.

Push-button ease of operation

Once FreeTalk™ is set up, all you have to do to talk is press the "push to talk" (PTT) button.

Other Features

- Auto power off (2 hours)
- Battery saver
- Time-out timer (3 or 10 minutes)
- On/off switch for key beep
- 4 call tones (5 call tones when using SMC-34 speaker microphone)
