

About the RTU-292:

The RTU-292 is an automatic telephone interconnect unit for the connection of one telephone line with one radio. It offers the flexibility of several modes for manned or unmanned station operation.

The RTU- 292 Radio/ Telephone Interface Unit provides trouble-free automatic connection between a radio system and a telephone system or other two-wire line. The unit is suited for use with HF, VHF, UHF, or satellite systems and is applicable to full-duplex or half-duplex modes. The unit incorporates a full-featured telephone set and monitor speaker.
