

NEED VoIP? NO PROBLEM.

DSPatchNET — VoIP CAPABILITY / AVTEC RELIABILITY

Dispatching communications has never been easier. Instantly connect multiple phones, radios, base station controllers, intercoms and more—just by touching the screen.

Whatever communications technologies you're using, **DSPatchNET** seamlessly integrates these applications into a single system.

At the forefront of dispatch console systems, **DSPatchNET** offers:

DISASTER RECOVERY

Accidents, equipment failures, natural disasters and even human error can threaten to disrupt your organization. But with **DSPatchNET**, you keep operating. Its flexible configurations allow you to adopt the business continuity strategy that's right for your needs and your budget.

REDUNDANCY

Your operations can't afford a moment of downtime. Your profits, or even lives, are at stake. The multilevel, automatic redundancies of **DSPatchNET** mean that even if a component fails, your system keeps operating.

INTEROPERABILITY

You need communications resources that can work together. Avtec systems have provided a strong integration capability for over 25 years. Pick and choose the equipment you need; **DSPatchNET** allows you to integrate multiple interfaces, suppliers, devices and protocols seamlessly.

REMOTE MAINTENANCE

Demanding users, a tough environment and a lower maintenance budget add up to strained resources for your operation. **DSPatchNET** remote maintenance capabilities allow you to support systems from anywhere, using a secure VPN connection. You can update screen configurations, user passwords, phone numbers, audio levels and more from the same location.

Whether you need a single site system or a multisite system spanning several cities, **DSPatchNET's** scalable architecture provides the perfect fit.
