

VXR-7000 Series

VHF/UHF Desktop Repeater/Base Station

SPECIFICATION SHEET – NORTH AMERICA

Dual-Purpose Repeater, Continuous-Duty and Cycle-Rated

The VXR-7000 helps expand communication range of two-way radio systems, and can operate as a base station. Continuous-duty and cycle-rated to enhance productivity for a maximum return on investment.

Local or Remote Operating Capability

Controlled by the operator with a press of a button to function as programmed. Or, switch to remote mode and the unit is controlled by instructions received from an external device connected to the accessory connector.

When Safety Counts

The VXR-7000 has built-in DTMF decoding to coordinate with the Emergency and ANI functions found in Vertex Standard mobile and portable two-way radios. If an Emergency alert is received from a mobile or portable radio, the VXR-7000 will beep loudly and blink the LCD to notify the dispatcher of the alert.

Uninterrupted Power Supply

For uninterrupted operation during power failures, a 12 volt rechargeable battery may be connected. During a power outage, the automatic power control circuit will immediately switch the repeater to the backup battery.

Convert to Talk at a Press of a Button

While a full-featured repeater, the VXR-7000 immediately switches to function in base station mode simply by pressing the Push to Talk Transmit button. Once released, the unit converts back to repeater mode.
